

Uran Vehicle Entry Pass System Portal

User Guide — A streamlined digital solution for managing vehicle entry permits at ONGC facilities

URAN INFOCOM SERVICES

Purpose & Who Uses It

Why This System Exists

- Digitize permits — Replace paper-based vehicle entry processes
- Faster approvals — Real-time tracking and notifications
- Stronger security — Verified identity and document checks

Who Uses the Portal

External Users

Register and submit permit requests; approval required before entry

ONGC Users

Login via domain credentials to review and forward permits

Approvers & Security

Final gate-level verification and permit authorization

System Workflow

Every vehicle entry permit follows a clear, auditable path from submission to gate clearance.

All stakeholders — external users, ONGC reviewers, and approvers — can track the live status of any permit at any stage of the process.

Key Modules & Security Verification

Portal Modules

01

External User
Registration

02

Create Permit

03

Review Permit

04

Approve Permit

05

Track Permit

Security Gate Login

Security personnel access a dedicated login to verify all approved permits at the gate in real time.

Username: uran_uransec@system.local

This view displays all approved permits ready for gate verification — ensuring only authorized vehicles enter the facility.

Thank You

For questions or support regarding the Uran Vehicle Entry Pass System Portal, please mail us @ infocom_uran@ongc.co.in.

Secure

Verified credentials and document checks at every step

Fast

Digital approvals replace slow paper processes

Transparent

Real-time tracking for all stakeholders
